SUMMARY

UI Developer with 4 years of hands-on experience building scalable, high-performance web applications across HealthCare, Casino Gaming, and B2B Marketing Automation domains. Proven expertise in Angular, React, TypeScript, and RxJS — delivering enterprise-grade solutions with modular architecture, RBAC, REST API integration, and responsive design. Adept at collaborating in Agile teams, mentoring junior developers, and consistently optimizing application performance across complex, cross-domain projects.

EXPERIENCE

UI Developer

07/2025 – 02/2026

Digital Factory 24

Marigold, Kalyani Nagar, Pune

Developed **MassEngage Lead Accelerator** B2B marketing automation platform

- Led frontend transformation of a scalable B2B SaaS lead generation platform using Angular 13 with feature-based modular architecture, lazy-loaded feature modules, and reusable UI components
- Engineered a dynamic campaign workflow builder with drag-and-drop graphical visualization, conditional branching, and automated lead scoring rule engine
- Implemented Role-Based Access Control (RBAC) with Angular route guards, CanActivate/CanLoad guards, custom permission directives, and role-driven UI element visibility
- Built automated lead lifecycle engine: real-time assignment logic, email notifications with Excel attachment reports, and intelligent redistribution for rejected or uncontacted leads
- Developed configurable lead export (XLSX/PDF) and analytics dashboards displaying funnel metrics, conversion rates, agent performance, and campaign ROI trends
- Architected reusable component library (smart tables, reactive forms, stepper modals, chart widgets) using Angular Material, reducing feature development time across modules
- Applied RxJS operators (switchMap, debounceTime, combineLatest, takeUntil) for efficient async streams, eliminating race conditions and memory leaks
- Optimized bundle output via AOT compilation, tree shaking, and Webpack bundle analysis — reducing initial load time by ~30%

Software Developer

11/2024 – 07/2025

Prognosticsoft Solutions Pvt Ltd

Sangavi Aundh, Pune

Developed **Healthcare Trial Accelerator Platform** for streamlining clinical trial lifecycle management

- Led Angular 14 frontend development for a multi-module clinical trial SaaS platform, establishing feature-based architecture with shared libraries and clean module boundaries
- Designed and built 30+ reusable Angular components (data tables, multi-step wizards, dynamic forms, patient cards, timeline trackers) and injectable shared services for cross-module use
- Collaborated closely with product owners and backend teams to define API contracts, data models, and integration workflows for 20+ RESTful endpoints
- Implemented NgRx store with typed actions, reducers, selectors, and effects for centralized state management; applied OnPush change detection and lazy loading to optimize performance
- Enforced granular RBAC (Admin, Investigator, Monitor, Coordinator) via route guards and structural directives; integrated JWT-based auth with auto token refresh via HTTP interceptors
- Implemented audit trail logging on all data mutations to meet 21 CFR Part 11 and HIPAA electronic records compliance requirements
- Worked with QA and DevOps teams on CI/CD pipeline setup (Azure DevOps), test automation with Jasmine/Karma, and streamlined deployment and bug tracking via Jira

SKILL PROFICIENCY

Angular	92%
TypeScript	88%
JavaScript	90%
React.js	78%
RxJS	83%
HTML5/CSS3	95%
PixiJS/Canvas	72%
D3.js	65%

STRENGTHS

- Team Collaboration
- Problem Solving
- Adaptability
- Mentoring & Leadership
- Performance Optimisation

KEY ACHIEVEMENTS

Healthcare Trial Accelerator Project

Successfully developed a comprehensive healthcare trial platform that streamlined clinical trial management

MassEngage Lead Accelerator

Engineered a scalable B2B SaaS lead generation platform with Angular 13, implementing RBAC, automated lead lifecycle management, and analytics dashboards — reducing manual lead processing effort and accelerating campaign delivery for enterprise clients.

Sr. Software Developer

05/2024 – 11/2024

Zensar Technologies

Kharadi, Pune

Developed dynamic and engaging online slot games for a global casino gaming platform (**MG Asia**)

- Developed immersive slot game UIs using PixiJS WebGL renderer and HTML5 Canvas API, achieving consistent 60fps gameplay across desktop, tablet, and mobile browsers
- Engineered fluid reel spin animations with custom easing curves, motion blur during spin, landing bounce physics, and win-line highlight sequences using PixiJS ticker and tweening library
- Implemented configurable payline engines supporting 5, 10, 20, and 243-ways configurations with dynamic win calculation and visual payline overlay rendering
- Built 3-reel and 5-reel game mechanics including wild substitutions, scatter detection, free spin triggers, multiplier stacking, and cascading reel (avalanche) mechanics
- Designed and integrated a progressive jackpot meter with real-time WebSocket-based increment feeds and milestone-triggered jackpot win celebration animations
- Engineered bonus round mini-games (pick-a-prize, wheel spin, free spins mode) driven by a finite state machine for predictable, testable game state transitions
- Built a real-time leaderboard system and tiered player rewards module with achievement badges, XP level tracking, and loyalty milestone notifications
- Optimized asset pipeline using texture atlases, compressed sprite sheets, and progressive lazy loading — reducing initial game load time by ~35%

UI Developer

02/2024 – 05/2024

Digital Crown IT Systems LLP

Kothrud, Pune

Developed **MSettu** and **Nahikalii** platforms for Mahindra & Mahindra managing various business processes

- Architected MSettu using Angular 16 standalone components to streamline Mahindra's financial workflows, supply chain operations, and dealer performance reporting pipelines
- Implemented role-segregated dashboards (Finance, Operations, Admin) with configurable widget layouts and permission-controlled data visibility per user role
- Built Nahikalii as a fully responsive React.js application using SASS modules for scoped styling and React hooks (useState, useEffect, useContext, useReducer) for state management
- Integrated PixiJS canvas scenes and D3.js chart types (bar, line, donut, heatmap) to render real-time operational KPIs and business intelligence metrics interactively
- Connected 10+ REST APIs using Axios with request interceptors for token auth, deduplication, and standardized error boundary handling across both platforms
- Optimized React performance via React.memo, useMemo, useCallback memoization, react-window virtualized lists, and lazy-loaded route-based code splitting
- Delivered both platforms within a 3-month Agile engagement using bi-weekly sprints, Jira task tracking, and GitLab merge request workflows with mandatory code review gates

SME

09/2021 – 02/2023

UpThink Experts Pvt. Ltd

Kothrud, Pune

Developed a comprehensive **Digital Learning** platform for enhanced user experiences

- Contributed as SME and frontend developer to a full-scale LMS platform serving 5000+ learners across academic and professional corporate training segments
- Integrated multi-modal content delivery: HLS video streaming with playback controls, interactive quizzes, graded assignments, downloadable e-books, and live session scheduling with calendar sync
- Designed a personalized learning path recommendation engine suggesting courses and resources based on user role, skill gap analysis, progress history, and behavioral engagement signals
- Built a module-level and course-level assessment engine supporting MCQ, fill-in-the-blank, and descriptive formats with configurable time limits, attempt restrictions, and automated scoring
- Created instructor and learner dashboards with real-time progress rings, streak indicators, XP-based gamification, completion certificate generation, and deadline alerts
- Integrated a data analytics pipeline tracking video watch duration, quiz scores, module completion rates, and session frequency — surfaced in instructor reporting dashboards
- Collaborated with subject matter experts to digitize and structure course content into intuitive LMS modules with consistent UX patterns and accessibility compliance

KEY SKILLS

Angular, Javascript, Typescript, ReactJS, HTML5, CSS3, Firebase, Bootstrap, Angular Material, Material Design, MEAN/MERN, Canvas, Tailwind CSS, Next.js, Ionic, Twilio, jQuery, React UI Tools, Ant Design, RxJS, SASS, D3.js, NgRx, PixiJS, REST APIs, GraphQL, Node.js, Express.js, MongoDB, Azure, Webpack, ES6+, PWA, Micro-frontends, Lazy Loading, RBAC, Responsive Design, WCAG / Accessibility, HIPAA Compliance, Jasmine / Karma, CI/CD, Agile / Scrum, Figma, Storybook, JSON, AJAX

TOOLS

Git, GitLab, GitHub, Bitbucket, Azure DevOps, Jira, Confluence, Trello, Visual Studio Code, Visual Studio, GitHub Copilot, ChatGPT, Postman, Swagger / OpenAPI, npm, Yarn, Angular CLI, Webpack, Vite, Chrome DevTools, SonarQube, Figma, Adobe XD, Zeplin, Beefree, Unbounce, Firebase, MS Teams

EDUCATION

Master of Science

RB Narayanrao Borawake College

06/2014 – 04/2016 Shrirampur

Bachelor of Science

Sir Parashurambhau College

06/2009 – 10/2013 Pune

PROJECTS

B2B MARKETING AUTOMATION

MassEngage Lead Accelerator

Digital Factory 24 — 06/2025 – 02/2026

UI Developer

Angular 13, TypeScript, RxJS, Angular Material, Bootstrap, Azure

Scalable B2B SaaS platform for automated lead generation and marketing campaign management.

- Led frontend transformation of a scalable B2B SaaS lead generation platform using Angular 13 with modular architecture
- Engineered a dynamic campaign workflow builder with graphical visualization and automated lead scoring
- Implemented Role-Based Access Control (RBAC) using route guards and permission-driven UI rendering
- Built automated lead lifecycle management: real-time assignment, email notifications with Excel reports, and intelligent redistribution logic for rejected leads
- Developed lead export features (XLSX/PDF) and analytics dashboards for campaign performance tracking
- Integrated REST APIs for real-time data sync and built reusable Angular components to accelerate delivery
- Optimized performance with lazy-loaded modules, RxJS Observables, and efficient API state handling

DIGITAL MARKETING

Landing Pages, Proof of Concept & Webinar Platform

Digital Factory 24 — 11/2024 – 02/2026

UI Developer

HTML5, CSS3, JavaScript, React, Bootstrap, Beefree, Unbounce

40+ enterprise landing pages & in-house live webinar platform for clients including Google, F5, Splunk, Lenovo, Cofece, HP, Databricks, Adobe, RedHat, Fortinet, Proofpoint and more.

- Designed and delivered 40+ responsive, brand-aligned enterprise landing pages for global clients across diverse industries
- Built POCs using Beefree and Unbounce templates optimized for email traffic, lead conversion, and A/B testing
- Integrated landing page forms with CRMs (Salesforce, HubSpot) for real-time lead capture and UTM-based campaign tracking
- Developed a full end-to-end webinar journey for F5: registration, confirmation emails, live streaming, speaker profiles, and agenda modules
- Implemented responsive layouts ensuring cross-browser and cross-device compatibility across all deliverables
- Collaborated with marketing and design teams to maintain brand consistency and optimize page load performance

HEALTHCARE

Healthcare Trial Accelerator

Prognosticsoft Solutions Pvt Ltd — 11/2024 – 06/2025

Software Developer

Angular 14, TypeScript, RxJS, Angular Material, REST APIs, Azure

End-to-end clinical trial lifecycle management platform meeting HIPAA and WCAG compliance standards.

- Led frontend development using Angular 14 ensuring scalable, maintainable architecture with feature-based module structure
- Designed and built reusable Angular components and shared services aligned with Angular best practices
- Built real-time monitoring dashboards for clinical trial milestones, patient enrollment, and site performance tracking
- Implemented lazy loading, NgRx state management, and OnPush change detection to optimize app performance
- Integrated REST APIs with role-based secure authentication and granular access controls per user type
- Conducted code reviews and mentored junior developers to maintain consistent coding standards across the team
- Ensured full HIPAA compliance, audit trail logging, and WCAG 2.1 accessibility standards across all modules

CASINO GAMING

MG Asia – Online Slot Game Platform

Zensar Technologies — 05/2024 – 11/2024

Sr. Software Developer

HTML5, JavaScript, TypeScript, PixiJS, Canvas, Bootstrap, Okta

Immersive cross-platform casino slot game platform with real-time game mechanics and player rewards.

- Developed user-friendly slot game UIs optimized for cross-platform play across desktop, tablet, and mobile devices
- Integrated dynamic reel animations, symbol transitions, and bonus visual effects using PixiJS and HTML5 Canvas
- Implemented multiple payline configurations, 3-reel/5-reel mechanics, wilds, scatters, free spins, and multipliers
- Engineered progressive jackpot mechanics and bonus round triggers with smooth state transitions
- Built real-time leaderboards and a player rewards system featuring in-game achievements and loyalty tracking
- Ensured RNG-based fair play compliance and performance optimization for smooth, lag-free gameplay
- Contributed to analytics integration for player behavior tracking and game performance insights

AUTOMOTIVE & INDUSTRIAL

MSettu & Nahikalii – M&M Platforms

Digital Crown IT Systems LLP — 02/2024 – 05/2024

UI Developer

Angular 16, React.js, TypeScript, D3.js, PixiJS, SASS, RxJS, REST APIs

Dual platforms for Mahindra & Mahindra: financial operations management (MSettu) and interactive business UI (Nahikalii).

- Designed MSettu — a digital platform to streamline financial operations, supply chain management, and real-time reporting for Mahindra & Mahindra
- Built Nahikalii as a fully responsive, cross-device UI using React.js with SASS for custom styling and PixiJS for data visualizations
- Integrated REST APIs for real-time data updates and optimized app performance through lazy loading and code splitting
- Applied D3.js for interactive charts and graphs to visualize business metrics and operational KPIs
- Ensured timely delivery through Agile sprints with Git-based version control and daily stand-up collaboration

E-LEARNING

Digital Learning Platform

UpThink Experts Pvt. Ltd — 09/2021 – 02/2023

SME

HTML5, CSS3, JavaScript, Angular, REST APIs, Data Analytics, LMS

Comprehensive digital learning platform supporting multi-modal content delivery, personalized learning paths, and automated assessments.

- Played a pivotal role in the development of a comprehensive digital learning platform serving diverse learner segments
- Integrated multi-modal content: video lectures, quizzes, assignments, and e-books to support varied learning styles
- Implemented personalized learning path algorithms that recommend tailored resources based on individual user progress and behavior
- Created an automated assessment and grading system providing real-time feedback and streamlined evaluation workflows
- Built an interactive course progress tracker with visual dashboards for both learners and instructors
- Integrated data analytics to monitor user engagement, course completion rates, and overall platform effectiveness
- Collaborated with subject matter experts to structure and digitize course content into an intuitive LMS interface
